

CJC-1295 + IPAMORELIN

GH Releasing Peptide Stack

Muscle · Recovery · Anti-Aging

What Is This Stack?

CJC-1295 (GHRH analog) + Ipamorelin (selective GHS) is a synergistic peptide combination that amplifies natural growth hormone pulses for enhanced anabolic and regenerative effects.

How It Works

CJC-1295 Prolongs GH release via extended half-life and pituitary stimulation.	Ipamorelin Provides selective, clean GH pulses with minimal side effects.	Synergy Together they create sustained, high-amplitude GH elevation.

Areas of Research Interest

- Accelerated muscle growth and strength
- Enhanced fat loss and body recomposition
- Faster recovery and injury healing
- Improved sleep and energy levels
- Anti-aging and skin health benefits

Common Research Approaches

Subcutaneous injections, often combined in the same syringe. Multiple daily or nightly dosing protocols are common in GH optimization research.

FOR RESEARCH PURPOSES ONLY · NOT FOR HUMAN CONSUMPTION

Educational only — not medical advice. Consult qualified professionals. All related compounds are not evaluated or approved as treatments for any condition.
