What Is GHK-Cu?

GHK-Cu is a naturally occurring copper-binding tripeptide (Glycyl-L-Histidyl-L-Lysine) with strong regenerative properties. It is widely researched for skin repair, collagen production, and anti-aging effects.

How It Works

Collagen & Elastin	Antioxidant & Repair	Gene Expression
Stimulates production for firmer, more elastic skin.	Reduces oxidative damage and promotes wound healing.	Modulates genes involved in tissue remodeling and inflammation control.

Areas of Research Interest

- Skin rejuvenation and wrinkle reduction
- Accelerated wound healing
- Hair growth and follicle health
- Anti-inflammatory effects
- Overall tissue regeneration

Common Research Approaches

Topical creams, subcutaneous injections, or combined in stacks (e.g., with KLOW). Studied for cosmetic, wound, and regenerative applications.

FOR RESEARCH PURPOSES ONLY · NOT FOR HUMAN CONSUMPTION
