

KLOW

Peptide Blend

Healing · Recovery · Regeneration · Anti-Inflammation

What Is KLOW?

KLOW is a synergistic 4-peptide research blend combining BPC-157, GHK-Cu, TB-500 (TB-4), and KPV. It is designed to support comprehensive tissue repair, reduce inflammation, and promote cellular regeneration.

How It Works

BPC-157 Accelerates healing of muscles, tendons, gut lining, and promotes angiogenesis.	GHK-Cu Copper peptide that boosts collagen, improves skin/hair health, antioxidant effects, and gene expression for repair.
TB-500 Enhances cell migration, flexibility, blood flow, and reduces scarring for faster recovery.	KPV Potent anti-inflammatory tripeptide that calms immune responses and supports gut/skin health.

Benefits & Research Areas

- Accelerated tissue repair and wound healing
- Reduced inflammation and immune balance
- Skin rejuvenation and collagen production
- Gut health and digestive repair
- Muscle/tendon recovery and flexibility
- Overall regeneration and anti-aging support

Common Research Approaches

Studied as a comprehensive peptide stack for synergistic effects on healing pathways. Often researched alongside lifestyle factors like exercise, nutrition, and recovery protocols.

FOR RESEARCH PURPOSES ONLY · NOT FOR HUMAN CONSUMPTION
