

KPV

Anti-Inflammatory Tripeptide

Gut Health · Skin · Immune Modulation

What Is KPV?

KPV (Lys-Pro-Val) is a potent anti-inflammatory tripeptide derived from alpha-MSH. It is researched for its ability to reduce inflammation without broad immunosuppression.

How It Works

Inflammation Control	Gut Barrier Support	Skin & Immune Benefits
Inhibits pro-inflammatory cytokines and pathways.	Promotes intestinal healing and reduces permeability.	Calms overactive immune responses in skin and other tissues.

Areas of Research Interest

- Inflammatory bowel conditions
- Skin disorders (e.g., psoriasis, eczema)
- Gut health and barrier repair
- Reduced systemic inflammation
- Immune balance without suppression

Common Research Approaches

Oral, topical, or injectable in studies focused on IBD, dermatology, and inflammatory conditions. Often included in blends like KLOW.

FOR RESEARCH PURPOSES ONLY · NOT FOR HUMAN CONSUMPTION

Educational only — not medical advice. Consult qualified professionals. All related compounds are not evaluated or approved as treatments for any condition.
