

PINEALON

Brain & Pineal Peptide

Cognitive · Neuroprotection · Longevity

What Is Pinealon?

Pinealon is a synthetic tripeptide (Glu-Asp-Arg) derived from pineal gland proteins. It is researched for its ability to regulate brain function, normalize pineal activity, and support neuronal health.

How It Works

Pineal Regulation	Neuronal Protection	Cognitive Support
Supports melatonin production and circadian rhythms.	Protects brain cells and promotes repair mechanisms.	Enhances memory, focus, and overall brain performance.

Areas of Research Interest

- Improved cognitive function and memory
- Better sleep and circadian balance
- Neuroprotection against age-related decline
- Enhanced brain repair and resilience
- Potential longevity benefits

Common Research Approaches

Subcutaneous injection in studies focused on brain health, aging, and neurological support.
