

PT-141 (BREMELANOTIDE)

Melanocortin Agonist

Libido · Sexual Arousal

What Is PT-141?

PT-141 is a synthetic peptide analog of alpha-MSH that acts on melanocortin receptors. It is researched for its unique ability to stimulate sexual arousal centrally in the brain.

How It Works

Melanocortin Pathway	Central Action	Libido Enhancement
Activates MC4R in the hypothalamus for sexual motivation.	Works in the brain rather than vascularly (unlike PDE5 inhibitors).	Increases desire and arousal in both men and women.

Areas of Research Interest

- Hypoactive Sexual Desire Disorder (HSDD)
- Erectile dysfunction (non-vascular)
- Female sexual arousal
- Overall libido enhancement
- Potential mood and reward system effects

Common Research Approaches

Subcutaneous injection as needed. Researched as a non-hormonal option for sexual dysfunction.
