

SELANK

Anxiolytic Peptide

Stress Relief · Cognitive Support · Neuroprotection

What Is Selank?

Selank is a synthetic heptapeptide analog of tuftsin with strong anxiolytic (anti-anxiety) and nootropic effects. It is researched for mental health, stress reduction, and immune modulation without sedation.

How It Works

GABA Modulation Enhances inhibitory neurotransmission for calm without drowsiness.	BDNF Upregulation Supports neuron growth and plasticity.	Immune Balance Modulates cytokine levels and reduces inflammation.

Areas of Research Interest

- Reduced anxiety and stress
- Improved focus and cognitive function
- Better mood and emotional resilience
- Neuroprotection and brain repair
- Immune system support

Common Research Approaches

Intranasal administration for rapid central nervous system effects. Used in anxiety, cognitive, and neuroprotective research.
