

SEMAX

Nootropic Peptide

Cognitive Enhancement · Neuroprotection

What Is Semax?

Semax is a synthetic heptapeptide analog of ACTH(4-10) with nootropic and neuroprotective properties. It is researched for brain health, cognitive performance, and recovery from neurological stress.

How It Works

BDNF & NGF	Neuroprotection	Cognitive Effects
Increases neurotrophic factors for neuron growth and survival.	Protects against oxidative stress and supports brain repair.	Enhances memory, focus, learning, and stress resilience.

Areas of Research Interest

- Improved memory and learning
- Enhanced focus and mental performance
- Neuroprotection and stroke recovery
- Stress and anxiety reduction
- Overall brain health

Common Research Approaches

Intranasal administration for direct central nervous system delivery. Used in cognitive and neuroprotective research protocols.
