

SEMAX + SELANK + DIHEXA

Nasal Combo

Cognitive Enhancement · Anxiolytic Support · Neurogenesis

What Is the Semax + Selank + Dihexa Nasal Combo?

This advanced three-peptide stack combines **Semax**, **Selank**, and **Dihexa** for comprehensive cognitive and neuroprotective research. All three are frequently studied via **intranasal administration** for efficient central nervous system delivery. The combination targets focus, stress resilience, and synaptic growth simultaneously.

How It Works

Semax	Selank	Dihexa
Boosts BDNF & NGF. Supports focus, memory, learning capacity, and neuroprotection.	Modulates GABA and cytokines. Reduces anxiety and stress while preserving mental clarity.	Potent neurotrophic peptide. Promotes synapse formation and long-term potentiation for deeper cognitive repair.

Areas of Research Interest

- Comprehensive cognitive enhancement (focus, memory, learning)
- Anxiety reduction and improved stress resilience
- Support for neurogenesis and synaptic plasticity
- Emotional balance and mental clarity under pressure
- Long-term brain health and recovery support

Common Research Approaches

Primarily studied via **intranasal administration** for rapid and efficient CNS delivery. This triple combination is researched in advanced nootropic and neuroprotective protocols aiming for both immediate cognitive performance and longer-term brain repair.
