

RESEARCH ONE-PAGER

GLP-3X

Triple-receptor agonist · GLP-1 / GIP / glucagon · metabolic research

10 mg, 15 mg, 20 mg, and 30 mg lyophilized vials

OVERVIEW

GLP-3X is HarmonyX's triple-receptor research peptide. It is studied on three metabolic doors at once: GLP-1, GIP, and glucagon — the incretin and energy-balance pathways that show up in appetite, blood-sugar, and body-composition research.

IN PLAIN LANGUAGE

In plain language, GLP-3X is looked at as a “three-lever” metabolic peptide. GLP-1 is the fullness and blood-sugar lever. GIP is the second incretin lever. Glucagon is the energy-burn / liver-glucose lever. Researchers use it when the question is bigger than appetite alone.

WHAT RESEARCHERS LOOK AT

- Appetite and satiety signaling (the GLP-1 lever)
- Blood-sugar and incretin-pathway research
- Energy-balance and body-composition models
- Glucagon-receptor questions around fuel use
- A next-generation comparison to dual-agonist (GLP-2X) designs

LABORATORY RECONSTITUTION

Reconstitute aseptically with bacteriostatic water or the diluent specified in the laboratory SOP. Invert gently until dissolved; do not shake vigorously. Larger milligram vials need more diluent than a 10 mg peptide — confirm the volume for the vial on the bench before starting. Aliquot if the design requires repeated sampling. Offered as 10 mg, 15 mg, 20 mg, and 30 mg vials.

STORAGE

Lyophilized: refrigerate, protected from light and moisture. After reconstitution: refrigerate and follow laboratory SOP (commonly 14–30 days with bacteriostatic water). Avoid repeated freeze–thaw cycles.

RESEARCH USE ONLY

The language above is a plain-English reading of published research interests. It is not medical advice and not a claim that this product treats, prevents, or diagnoses any condition. This material is not a drug or cosmetic, and it is not intended for human or veterinary use. HarmonyX supplies it to qualified research purchasers for laboratory work. Certificates of analysis are available on request.

Questions on this vial? Paul and Thabby review every request.
