

RESEARCH ONE-PAGER

Wolverine

BPC-157 + TB-500 · tissue-repair combination

10 mg and 20 mg lyophilized vials

OVERVIEW

Wolverine is HarmonyX's tissue-repair blend: BPC-157 plus TB-500 in one vial. It exists so a lab can study local knitting and cell-migration together instead of running two separate preparations.

IN PLAIN LANGUAGE

Think of BPC-157 as “knit this spot” and TB-500 as “get repair cells moving.” Together they are the catalog's most-asked-for repair pairing — the reason the vial is named Wolverine.

BPC-157 — knit the tissue

The local repair peptide

- Gut lining and GI-integrity research
- Tendon and ligament repair models
- Local blood-flow that repair depends on
- A focused, site-level knit signal

TB-500 — move the cells

The migration peptide

- Cell travel into a repair site
- Flexibility and actin-pathway research
- A broader recovery signal than BPC alone
- Pairs with BPC-157 in combination designs

TOGETHER

Used together, Wolverine is studied as a two-part repair picture: local integrity plus cell migration. That is why it is offered as one product.

LABORATORY RECONSTITUTION

Reconstitute aseptically with bacteriostatic water. Invert gently until dissolved; do not shake vigorously. A common laboratory starting point is 2 mL bacteriostatic water per 10 mg of peptide (5 mg/mL). Match the volume to the vial on the bench and confirm against the laboratory SOP. Aliquot if the design requires repeated sampling. Offered as 10 mg and 20 mg lyophilized vials.

STORAGE

Lyophilized: refrigerate, protected from light and moisture. After reconstitution: refrigerate and follow laboratory SOP (commonly 14–30 days with bacteriostatic water). Avoid repeated freeze–thaw cycles.

RESEARCH USE ONLY

The language above is a plain-English reading of published research interests. It is not medical advice and not a claim that this product treats, prevents, or diagnoses any condition. This material is not a drug or cosmetic, and it is not intended for human or veterinary use. HarmonyX supplies it to qualified research purchasers for laboratory work. Certificates of analysis are available on request.

Questions on this vial? Paul and Thabby review every request.
