

RESEARCH ONE-PAGER

Selank + Semax Blend

10 mg · lyophilized · neurocognitive pathway research

OVERVIEW

This vial combines two well-studied neuropeptides: Selank and Semax. Selank is looked at for how the body handles stress. Semax is looked at for thinking, memory, and mental stamina. Together, the blend is used in research that asks a simple question — can composure and cognitive sharpness be examined in the same preparation?

IN PLAIN LANGUAGE — WHY PEOPLE LOOK AT THIS BLEND

Think of Selank as the “stay steady” peptide and Semax as the “stay sharp” peptide. Researchers pair them when they want both: a calmer stress response and clearer thinking, instead of running two separate vials.

Selank — stay steady

The stress-and-composure side

- A calmer response when stress is high
- Less “wired” feeling in anxiety-style research models
- Steadier mood and easier focus under pressure
- Support for working memory when the load is heavy
- Immune-balance research alongside the stress work

Semax — stay sharp

The thinking-and-focus side

- Clearer thinking, learning, and memory
- Better attention during demanding tasks
- Mental energy when fatigue would normally set in
- Brain-support signaling (often discussed as BDNF)
- Recovery-style research after cognitive or neural stress

TOGETHER

Used side by side, the blend is studied as a two-part picture: Selank for how stress is handled, Semax for how clearly the system thinks afterward. That is why this 10 mg vial is built as one product instead of two.

LABORATORY RECONSTITUTION

Reconstitute aseptically with bacteriostatic water. Invert gently until dissolved; do not shake vigorously. Example for a 10 mg vial: 2 mL bacteriostatic water yields 5 mg/mL combined peptide. Confirm the volume against the laboratory SOP. Aliquot if the design requires repeated sampling.

STORAGE

Lyophilized: refrigerate, protected from light and moisture. After reconstitution: refrigerate and follow laboratory SOP (commonly 14–30 days with bacteriostatic water). Avoid repeated freeze–thaw cycles.

RESEARCH USE ONLY

The language above is a plain-English reading of published research interests. It is not medical advice and not a claim that this product treats, prevents, or diagnoses any condition. This material is not a drug or cosmetic, and it is not intended for human or veterinary use. HarmonyX supplies it to qualified research purchasers for laboratory work. Certificates of analysis are available on request.
